Yield to Maturity	3.22%

¹ Growth of \$10,000 for the years shown is calculated at NAV and assumes all dividends and capital gain distributions were reinvested. It does not take into account sales charges or the effect of taxes.

² Average annual total returns and calendar year returns assume all distributions are reinvested and reflect applicable fees and expenses. Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only, and do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance.

³ Expense ratios are based on the fund's most recent prospectus.

Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only, and do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance. Bloomberg Barclays US Corporate Bond Index measures the investment grade, fixed-rate, taxable corporate bond market.

Performance data shown represents past performance. Investment returns and principal value will fluctuate, so that fund shares, when redeemed, may be worth more or less than the original cost. Past performance does not guarantee future results and current performance may be lower or higher than the performance data shown. Visit madisonfunds.com or call 800.877.6089 to obtain performance data current to the most recent month-end.

Before investing, please fully consider the investment objectives, risks, charges and expenses of the fund. This and other important information is contained in the current prospectus, which you should carefully read before investing or sending money. For more complete information about Madison Funds® obtain a prospectus from your financial adviser, by calling 800.877.6089 or by visiting <https://www.madisonfunds.com/individual/prospectus-and-reports> to view or download a copy.

Madison Asset Management, LLC does not provide investment advice directly to shareholders of the Madison Funds. Materials on this document are informational only and should not be taken as investment recommendation or advice of any kind whatsoever (whether impartial or otherwise).

Standard Deviation measures dispersion from the an average, which, for a mutual fund, depicts how widely the returns varied over a certain period of time. Higher deviation represents higher volatility. **Downside Capture Ratio** measures a fund's performance in down markets relative to its benchmark. It is calculated by taking the security's downside capture return and dividing it by the benchmark's downside capture return over the time period. **Upside Capture Ratio** measures a fund's performance in up markets relative to its benchmark. It is calculated by taking the security's upside capture return and dividing it by the benchmark's upside capture return over the time period. **Effective Duration** provides a measure of a fund's interest-rate sensitivity. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates. **Average Maturity** is computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures. **SEC 30-day Yield** represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. It is calculated based on the standardized formula set forth by the SEC. **Yield to Maturity** measures the annual return an investor would receive if they held a particular bond until maturity as of the end of a report period. In order to make comparisons between instruments with different payment frequencies, a standard yield calculation basis is assumed. This yield is calculated assuming semiannual compounding. **Portfolio Turnover** is a measure of the trading activity in an investment portfolio—how often securities are bought and sold by a portfolio. It is calculated at the fund level and represents the entire fiscal year ending 10/31/2018.

An investment in the fund is subject to risk and there can be no assurance that the fund will achieve its investment objective. The risks associated with an investment in the fund can increase during times of significant market volatility. The principal risks of investing in the fund include: interest rate risk, call risk, risk of default, liquidity risk and non-investment grade security risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond funds have ongoing fees and expenses. More detailed information regarding these risks can be found in the fund's prospectus.

Madison Funds are distributed by MFD Distributor, LLC and may be purchased directly from the fund or through your investment professional. Portfolio data is as of the date of this piece unless otherwise noted and holdings are subject to change.

"Madison" and/or "Madison Investments" is the unifying tradename of Madison Investment Holdings, Inc., Madison Asset Management, LLC, and Madison Investment Advisors, LLC, which also includes the Madison Scottsdale office. Madison Funds are distributed by MFD Distributor, LLC. Madison is registered as an investment adviser with the U.S. Securities and Exchange Commission.
